

Replication package

Christoph Koenig & David Schindler, *Impulse Purchases, Gun Ownership, and Homicides: Evidence from a Firearm Demand Shock*

1 Structure of replication package

./Data/Raw Contains all datasets created by the authors using publicly available data. See below for additional public and restricted data.

./Data/R Contains all R objects (apart from those using restricted data) necessary for replication of the results.

./Export Contains all software-generated figures and tables from the main paper and appendix.

./R This folder contains the two R scripts used for the data construction and analysis. Both were written and executed using R version 3.6.1.

2 Contents of ./Export

2.1 Figures (.eps)

Number	File name
1	graph_nics_medium
2	map_sample_nvss
3a	diffplot_log_bgc_handgun_pc_anydelay_dummy_normal
3b	diffplot_log_homicide_pc_anydelay_dummy_normal
4a	coefplot_events_qd12_bgc_handgun_pc_anydelay_dummy
4b	coefplot_events_qd12_homicide_gun_pc_anydelay_dummy
5-11	NICS/graph_nics_state_XX
12	map_sample_ucr
13	coefplot_events_d12_gunowners_rand_pc_anydelay_dummy
14	coefplot_leaveout_d12_bgc_handgun_pc_anydelay_dummy_X_post1
15	coefplot_leaveout_d12_bgc_handgun_pc_anydelay_dummy_X_post2
16	coefplot_sfl_d12_bgc_handgun_pc_anydelay_dummy_X_post1
17	coefplot_sfl_d12_bgc_handgun_pc_sfl_2011_X_post1

18	coefplot_leaveout_d12_homicide_gun_pc_anydelay_dummy_X_post1
19	coefplot_sfl_d12_homicide_gun_pc_anydelay_dummy_X_post1
20	coefplot_sfl_d12_homicide_gun_pc_sfl_2011_X_post1
21	map_sample_gunshows
22	coefplot_events_qd12_gunshows_pc_anydelay_dummy
23	diffplot_bgc_handgun_pc_anydelay_dummy
24	diffplot_homicide_pc_anydelay_dummy
25	diffplot_d12_bgc_handgun_pc_anydelay_dummy
26	diffplot_d12_homicide_pc_anydelay_dummy
27	coefplot_events_qlog_bgc_handgun_pc_anydelay_dummy
28	diffplot_log_searches_gunstore_anydelay_dummy
29	coefplot_events_qlog_homicide_gun_pc_anydelay_dummy
30	coefplot_events_qd12_homicide_nogun_pc_anydelay_dummy
31	coefplot_events_d12_bgc_handgun_pc_anydelay_dummy
32	coefplot_events_d12_homicide_gun_pc_anydelay_dummy

2.2 Tables (.tex)

Number	File name
1	results_weapons_base
2	results_weapons_length
3	results_crime_base
4a	results_crime_sex
4b	results_crime_place
4c	results_crime_circum
5	N/A (Authors' work)
6	N/A (Authors' work)
7	results_weapons_addcontrol
8	results_weapons_rand
9	results_weapons_placebo
10	results_weapons_sample
11	results_weapons_levels
12	results_weapons_weights
13	results_weapons_fed
14	results_weapons_cluster
15	results_crime_addcontrol

17	results_crime_sample
18	results_crime_levels
19	results_crime_weights
20	results_crime_fed
21	results_crime_cluster
22	results_crime_state
23	results_crime_violent
24	results_crime_gunpref
25	results_crime_mortality
26	results_gunshows_base
27	N/A (Authors' work)
28	results_google_gunstore
29	results_weapons_cost
30	sumstat
31	ttstat
32	results_crime_age
33	results_crime_race
34	results_crime_datasets
35	results_weapons_length2

3 Replicating results

- Open `./R/guns_20210801_analysis.R`
- The script has an extensive preamble which needs to be executed first in order to replicate the results.
- The preamble also loads the objects stored in `./Data/R`
- The R script is written as if the objects `nvss` and `nvss.state`, which contain restricted-use data, were stored in `./Data/R`. Access to this data generally requires approval by the National Center for Health Statistics. See the hyperlink *NVSS Restricted-Use Mortality Data* below for further information on how to obtain this data and `./R/guns_20210801_data.R` on how we used it to constructed `nvss` and `nvss.state`.

- The replication is ordered by main text and appendices and by figures and tables within those.
- Each replication chunk has its own small preamble which needs to be executed first before running `exec.loop()`

4 Contents of `./Data/R (.RData)`

Object	Description
<code>county.controls</code>	County level control variables
<code>google</code>	Weekly state level Google data
<code>google2</code>	Monthly state level Google data
<code>gun.laws</code>	State level variables related to gun legislation
<code>gunshows</code>	Monthly county level gunstore data
<code>gunshows.xy</code>	Spatial points dataframe of gunshow locations
<code>map.counties</code>	Spatial polygon dataframe of U.S. counties
<code>map.country</code>	Spatial polygon dataframe of entire U.S.
<code>map.states</code>	Spatial polygon dataframe of U.S. states
<code>nics</code>	Monthly state level data of NICS background checks
<code>nosfl</code>	List of gun laws in Siegel et al. (2017) excluded from the analyses in Figures 16, 17, 19, and 20
<code>rand</code>	Yearly state level data of RAND gun ownership estimates
<code>sample.drop</code>	State level data containing sample definitions for NICS data
<code>state.controls</code>	State level control variables
<code>ucr</code>	Monthly county level UCR crime data

5 Data construction

- Open `./R/guns_20210801_data.R`
- The Dataverse contains only raw datasets which are created by the authors from publicly available data
- All other datasets are referenced in `./R/guns_20210801_data.R` using the `datapath` variable but paths (and names) generally need to be adapted accordingly by the user
- Guidance on where to obtain the raw data not included in the Dataverse is described under *Raw data sources*
